

How to make a bug trap

You will need:

A soft drink bottle

Scissors

String

Fruit

1. Cut the bottle in half
2. Put some fruit in the bottom of the bottle
3. Pierce holes in the bottle for the string to go through (you may need an adult to help you)
4. Turn the top of the bottle upside down
5. Attach the string to the bottle on both sides
6. Tie together the top and bottom of the bottle
7. Place your trap in the garden
8. After a few hours you will have a collection of bugs to look at. Don't forget to release the bugs when you are finished. They can easily find their way into the trap, but not back out.
